

Convector Heater

Features & Benefits

- Silent operation
- Ideal for use where occasional heating is required
- 3 heat outputs
- Thermostatic control
- Safety thermal cutout
- BEAB Approval

The Vent-Axia Convector Heater is ideal for use in any room where extra heating or occasional heating is required (not recommended for use in bathrooms). The Vent-Axia Convector Heater is suitable for either domestic or commercial use and can be floor standing or wall mounted. The unit offers three heat outputs; 0.75kW, 1.25kW and 2kW, and is supplied with a thermostatic control.

For maximum safety there is a thermal cut-out feature to prevent overheating.

The Vent-Axia Convector Heater is lightweight, portable and is supplied with a cable and plug. The Vent-Axia Convector heater is stylish and versatile and may be wall fixed or installed as a floor standing unit using the feet included. This gives the benefit of moving the heater to where you want, when you want.

Vent-Axia Portable convector Heaters are suited for many heating applications, in the home, offices, shops, workshops or where temporary heating is required such as site buildings.
