Uniflexplus+ RV
Adjustable Valve
Made-to-measure ventilation in every room

Adjustable valve
Uniflexplus+ RV is an adjustable valve for every room with three designs to suit different interior styles. The valve is suitable for both air supply and extraction up to 21 l/s.

Ease of use
Installing the valve is extremely easy. The correct volume of air can be adjusted in an instant by selecting one of the 26 available settings. To avoid interference, the valve can be locked in the selected setting.

Once installed, the valve is easy to clean - Its maintenance-friendly design means there is no need to remove the valve base.

Unique performance
The Uniflexplus+ flexible air distribution system is well known for the ease of installation it offers the installer and the high level of comfort it provides for occupants of the room.

The valve combines rapid installation, airtight connection and unique low-noise performance. Like the other components of Uniflexplus+, the adjustable valve is antistatic, antibacterial and UV-resistant.

Accessories for even more flexibility
Accessories are available for Uniflexplus+ RV to make it even more versatile in any application.

For instance, there is a special collar to allow it to be installed in suspended ceilings and also a blanking plate for directing the air flow.
Adjustable air volumes with lockable settings

Minimum resistance, minimum noise

One valve for air supply and extraction: suitable for up to 21 l/s.
Easy to adjust: 26 lockable positions for setting the air volume.
Excellent performance: the lowest noise and pressure drop values.
Same appearance for each volume of air: external dimensions stay the same irrespective of the selected setting.

Low turbulence airflows: prevents accumulation of dirt around the valve.
Flexible installation: for all types of air ducts with connection Ø116 or Ø125.
Easy to clean: no need to remove the valve base.
Multiple designs available: to suit various interior styles.

Multiple designs with uniform appearance

Easy to clean
