

## Why book a free site survey?

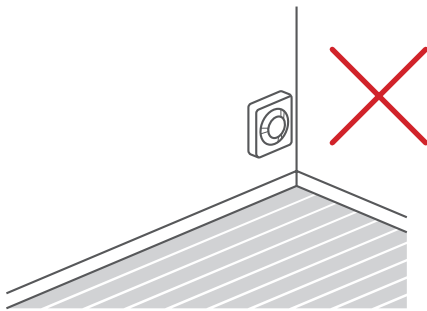

Well, because you wouldn't believe what we find on site:

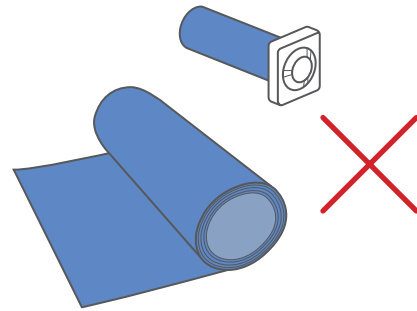

Flexible ducting with no condensate drain and not pulled tight, so full of water.

A mains voltage extractor fan fitted right next to a shower head.

An extractor fan fitted too low to the floor.

Homemade ducting made of felt roof lining.

Arrange your free  
no-obligation site  
survey today!

What our expert ventilation consultants can do for you:

- Determine the root cause of a condensation or mould issue
- Provide help and advice on ventilation for a refurbishment project
- Solve installation queries on site
